

# CyberMAC<sup>®</sup> Software

## The ultimate solution for The Petroleum Industry

CyberMAC<sup>®</sup> is the software that addresses your unique needs

- Accurate tax calculation
- Pricing flexibility
- Tracking of every gallon
- Powerful Customer Relationship Management
- Full integration with back-office accounting software

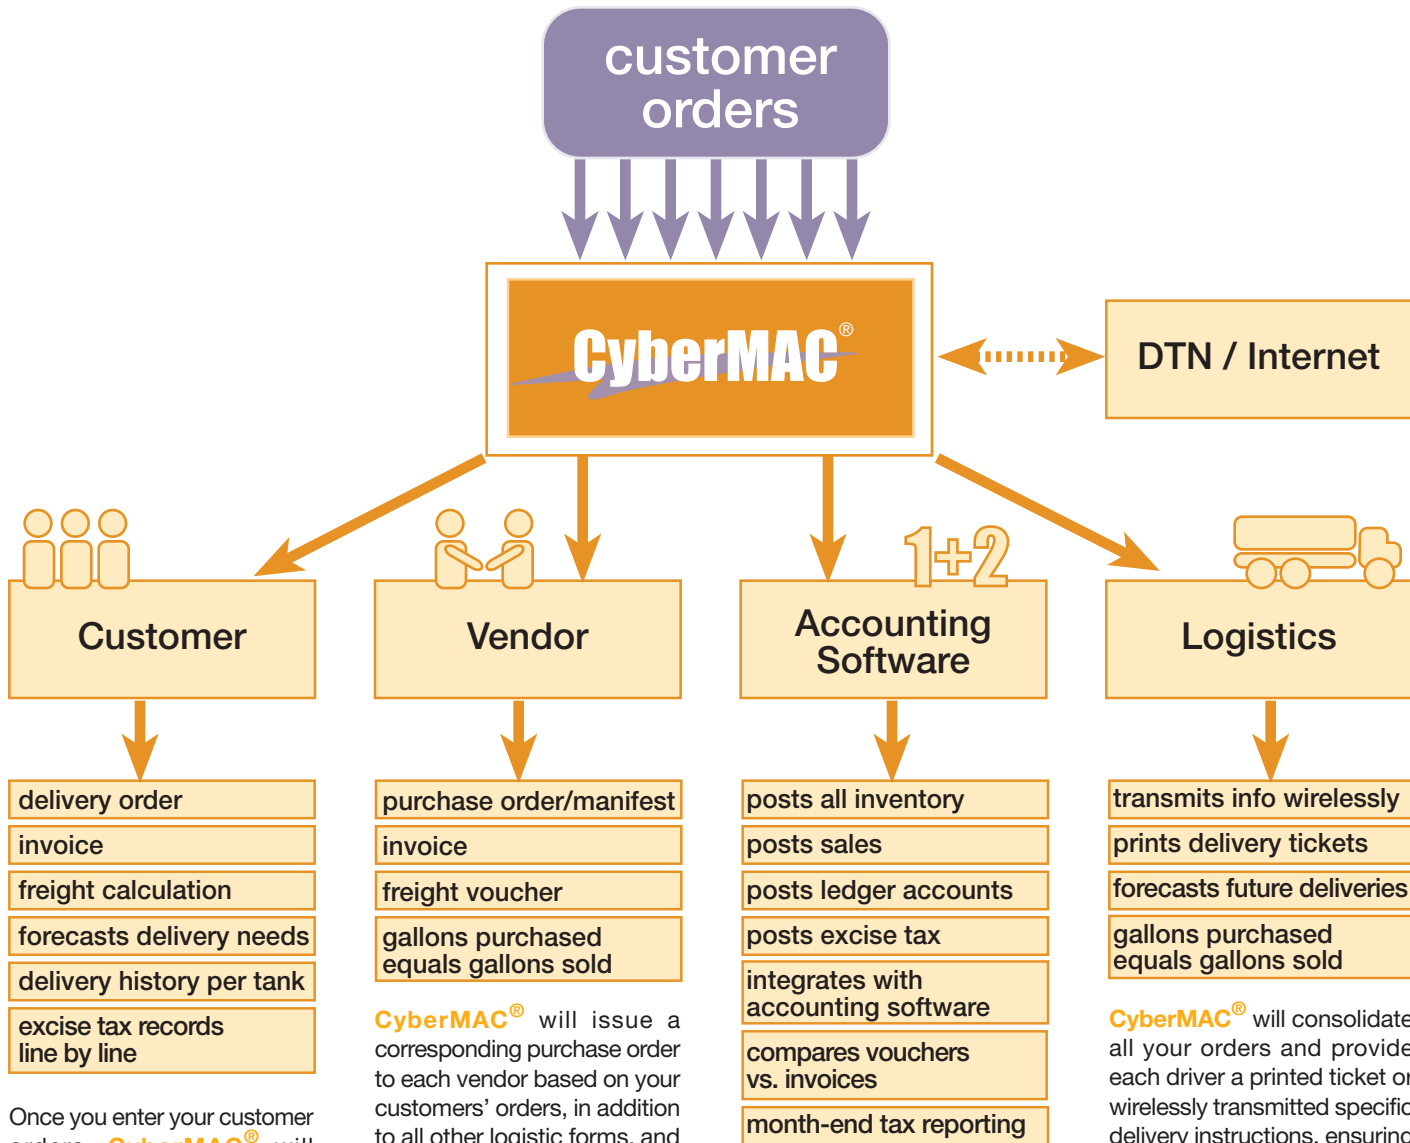

ABS of NJ  
Fueling Your Success

# CyberMAC® Petroleum Industry Software

CyberMAC® Petroleum software streamlines the order and fulfillment process, and reduces the manual input of multiple data to one element – your customer’s orders. CyberMAC® takes care of the rest by synchronizing with the fuel-price database, then automatically producing all the necessary operational, customer, billing and accounting documentation needed to fulfil your customer orders.

Once you enter your customer orders, CyberMAC® will produce all the necessary forms you require to track, bill, and properly account for each gallon sold, while calculating the precise appropriate tax calculations for each purchase.

CyberMAC® will issue a corresponding purchase order to each vendor based on your customers’ orders, in addition to all other logistic forms, and calculate all tax requirements per line item. CyberMAC® automatically creates A/P vouchers to vendors’ fuel and freight invoices.

Rather than having to manually reconcile each purchase order with your accounting system, with CyberMAC® all orders are automatically streamlined directly into your accounting software.

CyberMAC® will consolidate all your orders and provide each driver a printed ticket or wirelessly transmitted specific delivery instructions, ensuring that all your customers receive their correct orders.

- Manual entry by the software user
- Automatic input/output made by the software

**CyberMAC® Fuel Wholesaling software** makes your wholesaling job easier than you ever thought possible, getting rid of duplicate data entry and errors. From a single entry of data, **CyberMAC®** produces a delivery order, Invoice, PO/manifest, freight voucher, excise tax records; and posts all inventory, sales, and general ledger accounts.

**Tankwagon Fuel Distribution software** gives your gasoline, diesel & heating oil customers better service, while providing you increased control of your inventory and Tankwagon operations. **Tankwagon Meter Automation** transfers customer pricing and tax data to your delivery trucks and final delivery data to the office, eliminating errors and labor.

**C-Stores and Consignment software** provides the ultimate in home-office accounting system for your convenience stores and consignment locations, completely integrating fuel transactions from purchase to sale.

## Fuel Wholesaling

- **Prints a customer-friendly invoice** that shows taxes and freight for each line item, and shows net amount due after prompt-payment discount.
- **Calculates all invoice taxes line by line** and sets up the appropriate tax payable to the supplier or government.
- **Finds the lowest-price** supplier and terminal for a truckload of products.
- Assures that you **bill for all gallons** purchased.
- **Prints your month-end tax schedules**, using Crystal Reports.
- **Calculates the freight charges** on an invoice and creates an accounts payable voucher to the carrier.
- Automatically **creates a purchase order** for each manifest, complete with line item taxes.
- **Captures DTN prices automatically** and adjusts them for supplier differences.
- **Shows your gross profit** for each potential supplier and terminal.
- Provides **six different methods of pricing** fuel to customers

## Tankwagon Fuel Distribution

- **Forecasts delivery needs** – based on degree day, date, day of the week, and past consumption.
- **Prints/transmit via wireless technology delivery tickets** for tanks in forecast range selected for delivery, complete with prices and taxes.
- **Assigns delivery ticket numbers** that correspond to invoice records created for them at the same time.
- **Accepts entry of gallons delivered** to complete the invoicing record.
- Displays or prints **a daily list of keep-full tanks** that need deliveries.
- **Posts completed ticket invoices** to Elliott Accounts Receivable.
- Provides **six different methods of pricing** fuel to customers.

- Optionally **prints fuel invoices** to send to selected customers.
- **Posts all inventory**, sales, and general ledger accounts.
- **Sends digital data** to and from tankwagon for meter automation.
- **Maintains tank record** and delivery history for every customer tank.
